

SELECTING THE RIGHT TELEVISION

COMMERCIAL VS CONSUMER

Commercial Grade vs. Consumer Grade

Are you aware of the difference between commercial and consumer TV's?

Commercial TVs offer features that consumer TVs do not. Built to protect your investment, operate long hours, and improve your guest satisfaction, consumer TVs are loaded with features designed specifically for commercial industries.

Learn more below.

24/7 Power Supply

Commercial TV Screens are made to operate all day, every day. Consumer televisions are manufactured to run 6 - 8 hours per day.

RCA Commercial Warranty

Most RCA TVs come with a 2 (two) year warranty, vs the standard 1 (one) year consumer warranty. Additionally RCA offers an **Advanced Exchange Warranty** minimizing the downtime of a TV.

Volume Limiter Features

Sets the **maximum and initial volume settings** when the TV is turned on. Prevent guest rooms from raising TV volume to levels that disturb neighboring guest rooms.

Anti-Theft Features

Deters unauthorized movement of your television. A lockdown plate works with RCA TV bases to secure your television to furniture in a room. Lock down the TV for the added benefit of tipping prevention.

DESIGNED & BUILT FOR

Hotel Rooms

Made for Hotel rooms that require MPEG 4 Pro:Idiom™.

Hotel Lobby

Use Commercial TVs in your lobby! The TV volume limit and keypad lockout ensure settings cannot be changed without permission.

COMMERCIAL VS CONSUMER

WHICH TV IS RIGHT FOR YOU?

PT Series **Pro:Idiom** TVs

Pro:Idiom TVs are designed to work with DirecTV, Dish Network and other satellite or 3rd party content providers. If there is not a satellite box in the room or if your facility uses any of these, you will need Pro:Idiom TVs.

BE Series **Non-Pro:Idiom** TVs

Pro:Idiom TVs are not always required for Cable head end systems. Rooms with satellite boxes, usually do not need Pro:Idiom TVs. Check with the programming provider to see if Pro:Idiom TVs are needed.

Welcome Screen

A Branded Welcome Screen for your property. Make the *PT Series Television* your own by branding the main screen with your properties logo so guests see your brand every time they power ON the TV.

Create a Channel Lineup with Channel Remapping

Allows hotels to set their own channel lineup. Reorder, skip or hide channels to give guests easier access to their favorite shows. Select the initial channel, or rename each station with custom names. *Only available on the PT Series.*

Display Program Information with **PSIP**

Program System & Information Protocol. If PSIP is broadcasted by your provider, RCA TVs show the info (title & description) when changing channels, eliminating the info button. *Only available on the PT Series.*

Create a Schedule for your TV

Set a recurring time for the TV to power on and off. Perfect for Lobbies, Menu Boards & Digital Signage.

IR Pass-Thru use a 3rd Party Remote on an RCA TV.

If the hotel has a DirecTV DRE System, they can use a DirecTV remote to control both the receiver and RCA TV. Removing need for direct line of site to device. Required for DirecTV and most 3rd party content providers.

Quickly Setup a TV with Clone Programming

Duplicate the TV settings from one TV to another, saving time when configuring multiple TVs and reducing total cost of ownership.

Master & Guest Remotes available

The master remote is for the hotel to access special commercial features that guests don't need access to. The guest remote gives patrons the control they need, without being able to adjust settings made by the master remote.

Lock the Front Panel & Menus

Disable front panel and menu controls, to preventing unauthorized users from changing settings on the Television.
